

#### **Description**

Part of the Extreme series of ball valves we offer a PVDF, true double union ended ball valve, with choice of either EPDM or FPM O-Rings with ball seats in PTFE. The valve is fitted onto a powerful electric actuator (series 3003) via a special purpose made mounting bracket, which offers rigidity and strength. The valve has resistance to many inorganic chemicals, aggressive fluids and has excellent high flow characteristics.

Connections offered are metric solvent Socket, Threaded BSP and Flanged PN6/10.

The 3003 series electric actuators are available in a composite body, wide range of voltages and control options to suit your specific requirements. Limit switches, optical indicator and manual override are fitted as standard. High quality electrical components and alloy gearing ensure reliability and extended life span. The actuator is supplied with DIN connector.

#### **Design Advantages**

A ball valve from our Extreme Range, that offers high performance, excellent flow characteristics and a minimal pressure drop. Antiblock stem that avoids ball blockage.

**Chemical Resistance** 

Suitable for Aggressive Media

**Body Options** 

PVC-U / PVC-C / PP-H / PVDF / ABS

**Easy to Actuate** 

Our Purpose Built Mounting Kit

# **Extreme Series Electrically Operated PVDF Ball Valve**

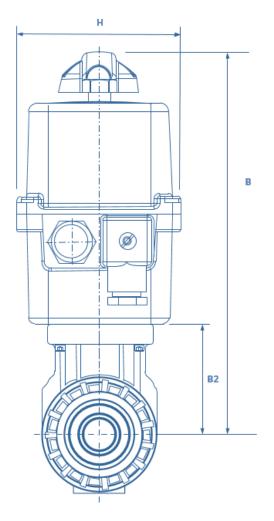

- Remote Isolating Flow in Liquid Systems
- 1/2" to 3", D20-D90
- PTFE Ball Seats, with Choice of O-Rings
- Threaded BSP, Solvent Socket-Metric, Flanged PN6/10
- Antiblock System that Avoids Blockage
- Suitable for Aggressive Media
- Multi Voltage

#### **FAIL SAFE**

An option of integrated safety battery backup is offered which will return the valve to the initial position in case of power failure.

### **FAIL SAFE OPTION**

## **Description**

The 3003 actuator can be supplied with an integrated fail safe option which offers security, ensuring the valve returns to the initial position in the case of a power failure.

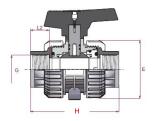

# **Advantages**

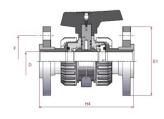

24/7 battery charge indicator with reporting relay Power shut off after 3 minutes to avoid battery discharge.

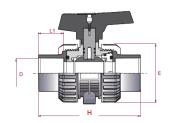

Quick and easy replacement of battery. 2 initial settings either normally open or normally closed.
