

I Application

Butterfly valves A480, whether manually or automatically operated, can be used in most liquid product applications in the food-processing, pharmaceutical and chemical industries. The design of the butterfly valve between flanges A490 facilitates its installation and maintenance, allowing the extraction of the valve by means of 4 screws while the flanges welded to the installation remain fixed.

The butterfly valve can be operated automatically through an actuator or manually with a handle. The handle blocks the valve in the "open" or "closed" position, although there are also other models with intermediate positions. The actuator transforms the axial movement of the piston into a 90° rotary movement which it transmits to the disc.

I Design and features

Hygienic design according to EHEDG guidelines.

Easily interchangeable manual handles and pneumatic or electric actuators.

Low pressure losses.

Body halves interchangeable with any connection type.

Traceability of components.

Gaskets comply with USP CLASS VI requirements.

I Technical specifications

Materials:

Disc	1.4404 (AISI 316L)
Body halves	1.4301 (AISI 304) or 1.4404 (AISI 316L)
Other St. St. parts	1.4301 (AISI 304)
Gasket	EPDM, HNBR, VMQ or FPM

Surface finish:

Internal	$Ra \leq 0,8 \mu m$
External	Machined

Available sizes:

DIN EN 10357 series A	DN 25 - DN 100
(previously DIN 11850 series 2)	

ASTM A269/270	OD 1" - OD 4"
(corresponds to OD pipe)	

Connections	Weld, male, nuts, clamp
-------------	-------------------------

I Technical specifications

Operating limits:

Working temperature (EPDM)	-10 °C to +120 °C	14 °F to 248 °F
Temperature SIP, max. 30 min.	+140 °C	284 °F
Minimum working pressure (absolute P.)	20 kPa (0,2 bar)	3 PSI
Maximum working pressure	1000 kPa (10 bar) ⁽¹⁾	145 PSI ⁽¹⁾

*Note (1): Classified according to Directive 97/23/CE as Category I valves for use with fluids of Group 1.

DN	25	32	40	50	65	80	100
Dry torque* [Nm]	5	5	5	8	15	25	30

OD	1"	1½"	2"	2½"	3"	4"
Dry torque* [Nm]	5	5	8	15	25	30

*For rotating the valve disc in a dry seal ring.

I Technical specifications: handles and actuators

Handles:

Multiposition handle	1.4301 (AISI 304) + plastic (PA6) or 1.4301 (AISI 304)
Two position handle	1.4301 (AISI 304) + plastic (PF31)

Actuators:

Housing	1.4307 (AISI 304L)
Support	1.4301 (AISI 304)
Air pressure	6-8 bar
Air connection	G 1/8 (Ø6 pipe)

Air consumption

Actuator	Single-acting	Double-acting
A940 - T1	1,3	3,4
A940 - T2	2,1	4,9

Compressed air consumption at P_{rel}=6 bar (litres N/cycle)

Standard assembly

Valve	A940 - T1	A940 - T2
A480 & A490	DN 10 to 50 OD 1" to 2"	DN 65 to 100 OD 2½" to 4"

I Options

Different handle types.

Single- or double-acting actuator or electric actuator.

Inductive position sensors.

C-TOP S control unit.

ATEX version available.

I Sizing

The following formula can calculate the required Kv for products with a similar density and viscosity to water:

$$K_v = \frac{Q}{\sqrt{\Delta p}}$$

where:

Q = flow (m³/h)

Δp = drop in pressure in the valve (bar)

Note: Tests performed with water at 20°C.
